

ZR6E/4B Primary Nickel Battery for DSC

Unique Technology Nickel Oxihydroxide Manganese Dioxide Cathode Technology

Specifically Designed for Digital Still Camera's
Designed to provide high capacity output characteristics demanded by DSC's

Longer Lasting Last 3 times longer than alkaline batteries (using 2 x AA size)

Fast Refresh Rate ZR6E/4B fast refresh rate allows for more shots than an alkaline cell

Please Note: ZR6E/4B are disposable (Single Use Only)

More Features

Provides powerful current instantaneously

More convenient than rechargeable batteries

Better value for money (ie: less cost per shot)

Comparable performance to rechargeable Ni-MH
