

TRADE INFORMATION GUIDE 2007

EXIDE EXTRA

THE BATTERY WITH THAT EXTRA SOMETHING

NOW WITH 36 MONTHS WARRANTY, THAT'S AN EXTRA 12 MONTHS

Advanced Calcium Ag9 technology for high performance and longer life, a real EXTRA bonus. Exide Extra is packed with EXTRA features that deliver real trade and consumer benefits. This premium product is manufactured in Australia in accordance with the latest production methods and quality controls.

- Advanced Calcium Ag9 technology combined with improved design to guarantee LONGER LIFE.
- Modern design featuring recessed terminals for added safety and stackability.
- Eye catching color to distinguish this as a battery above all others.
- Handle for safe, easy transportation and fitting.
- State of Charge Indicator.
- Improved internal design for maximum performance and long life.
- The latest in polyethylene envelope separators to protect against plate shedding vibration and provide longer life.
- Improved cranking and amp hour performance to meet the latest vehicle requirements.
- Sealed to resist spills and provide maintenance free performance.
- Wide range of EXIDE EXTRA to suit most popular late model vehicles.
- Distinctive labelling with Installation tips for the consumer and trade alike.

LOW MAINTENANCE

A range of lower capacity batteries with proven technology to suit very early model vehicles both imported and manufactured in Australia.

A national 12 Month Warranty is supported by an extensive dealer network.

The EXIDE LOW MAINTENANCE range uses a proven technology combined with the latest battery designs that have provided higher performance than previously achieved.

- Hybrid technology to suit electrical requirements of early model vehicles.
- Modern design featuring recessed terminals for added safety and stackability.

- Handle for safe, easy transportation and fitting.
- Improved internal design for maximum electrical performance and long life.
- The latest in polyethylene envelope separators to protect against plate shedding vibration and provide longer life.
- Positive seal vent plugs, to resist spills and allow topping when required.

EXIDE
Batteries

EXIDE ENDURANCE PLUS

A range of batteries to fit your latest model vehicles wherever they come from. The latest Calcium technology and some with Ag9 silver alloy as demanded by many new vehicle manufacturers.

A national 24 Months warranty to ensure peace of mind backed by a network of EXIDE dealers around Australia and New Zealand.

EXIDE ENDURANCE PLUS in many cases meets or exceeds the original vehicle electrical specifications of the vehicle manufacturer. In the case of Holden, Ford & Mitsubishi vehicles manufactured in Australia the recommended batteries are the approved replacement products that meet the manufacturers electrical requirements.

With features PLUS, the EXIDE ENDURANCE PLUS will be a high volume product demanded by your customers.

- Advanced Calcium technology some with Ag9 to resist extreme under bonnet temperatures and corrosion delivering LONGER LIFE.
- Modern design featuring recessed terminals for added safety and stackability.
- Handle for safe, easy transportation and fitting.

- Improved internal design for maximum performance and long life.
- The latest in polyethylene envelope separators to protect against plate shedding vibration and provide longer life.
- Improved cranking and amp hour performance to meet the latest vehicle requirements.
- Positive seal vent plugs to resist spills and provide maintenance free performance, can be removed for topping up if required.
- Wide range to suit many popular imported and locally made vehicles.

EXIDE ENDURANCE

A range of batteries with proven technology generally recommended for early model vehicles and some later models. With an average car park life of over 10 years there are many vehicles on the roads in excess of the average. The EXIDE ENDURANCE has the proven technology to suit the electrical requirement of these vehicles.

With a 24 Month National Warranty backed by an extensive dealer network your customers will travel with a real guarantee.

EXIDE ENDURANCE with proven technology comes with many modern features. Hybrid technology to suit electrical requirements of early model vehicles and many later models. Modern design featuring recessed terminals for added safety and stackability.

- Handle for safe, easy transportation and fitting.
- Improved internal design for maximum electrical performance and long life.
- The latest in polyethylene envelope separators to protect against plate shedding vibration and provide longer life.
- Positive seal vent plugs, coloured yellow as a check item, to resist spills and provide maintenance free performance with the ability to allow topping up if required.
- Wide range to suit many popular imported and locally made vehicles.
